

Evidence-Based Nursing

Contents

Purpose and procedure	34	Integrated care pathway based rehabilitation for acute stroke did not reduce length of hospital stay.....	53
EBN notebook		Intensive geriatric rehabilitation reduced hospital stay and time to independent living in hip fracture patients with mild to moderate dementia.....	54
Clinically useful measures of the effects of treatment.....	36		
Sigma Theta Tau contest		Assessment	
Evidence-based practice contest: innovations in clinical excellence	40	A clear urine specimen on visual inspection cannot totally exclude a diagnosis of urinary tract infection	55
Treatment		Causation	
Routine primary immunisation using a longer needle resulted in fewer local reactions in infants	41	Children who were exposed to antenatal corticosteroids and had birth weights ≤ 1500 g did not have adverse growth, cognitive, or lung function outcomes at age 14 years.....	56
Few young children had mild reactions to the measles, mumps, and rubella vaccine and older children had nearly no vaccine related reactions	42	Quality improvement	
Review: recall or reminder systems improve the rate of childhood and adult immunisation	43	A nurse led clinic and computer decision support system for anticoagulation decisions was at least as effective as a hospital clinic.....	57
A clinical pathway reduced use of nebulised β agonists and length of hospital stay in children with asthma exacerbations	44	Clinical prediction guide	
Review: brief primary care interventions are moderately effective for increasing physical activity	45	An antenatal index predicted postpartum depression with high sensitivity and moderate specificity	58
Contamination of urine specimens from women with acute dysuria did not differ with collection technique	46	Qualitative	
Review: NSAIDs, paracetamol, and analgesic/anti-inflammatory oral rinse reduce sore throat symptoms ..	47	Late adolescent girls used 4 stories to describe their smoking patterns.....	59
Docusate sodium with irrigation was better than triethanolamine polypeptide with irrigation for dissolving earwax.....	48	Teenage mothers with oppressive pasts created new family caregiving traditions	60
Early feeding after major non-laparoscopic gynaecological surgery did not increase gastrointestinal symptoms	49	Individuals with HIV/AIDS ascribed several different meanings to their use of complementary therapy.....	61
Adjunctive nurse telehealth care reduced depressive symptoms and improved functioning.....	50	Inpatients had mostly negative experiences of seclusion during short term treatment in a mental health facility.....	62
A shared care system of hospital follow up reduced pain and use of healthcare resources and increased satisfaction in patients with rheumatoid arthritis	51	Properly planned de-institutionalisation for mental illness maintained most in community living with enhanced quality of life	63
A cognitive behavioural family intervention reduced psychiatric morbidity in caregivers of patients with Alzheimer's disease	52	Elderly women described 5 phases of living with change after myocardial infarction	64
